

OVAL 8 FINGER SINGLE SPLINT – ALL SIZES

Oval-8 Finger Splints are the ideal choice whenever you need to stabilise or immobilise the small joints of your patient's fingers. The versatile 3-point pressure design allows each Oval-8 Finger Splint to treat 6 or more conditions with a simple turn of the splint.

3point:
products®

Can be worn
in 6 different
ways!

KEY BENEFITS

- Use Oval-8 Finger Splints to quickly and effectively treat: mallet finger, swan neck and boutonniere deformities, trigger finger and trigger thumb, lateral deviation, arthritis, fractures and hypermobility (Ehlers-Danlos syndrome)
- Made of seamless moulded plastic, the splints are so light and comfortable
- The open design keeps skin dry, and the broad flat bands distribute pressure evenly for wearing comfort
- Promote better hand function, so they can be worn full time or easily slipped on and off as needed
